A little more substantial interest taken in the Intelligencer's hydrophobia relief movement and the fund will reach proportions which will make it possible to send the fourth suspect to the Pasteur Institute at New York for treat-

ment. Three have already been sent on; their three have arready been sent on; their treatment and railroad fares will take \$56% of the fund, which leaves about \$50 for the fourth man. A few handsome individual sub-criptions and half of the proceeds of to-night's entertainment should bring the fund, up to \$750, the amount needed for the treatment of four.

# KANSAS CITY FIRE

Doss Great Damage-A Big Block De-stroyed. KANSAS CITY, April 14.—The Scar-

ritt block, a substantial five-story brick building in Walnut street near Ninth, and directly across the street from the Central Station of the Kanasa City fire department, was destroyed by fire to-night. The fire for a time threatened an entire block in the very heart of the city. The big six-story Hall building, extending south on Walnut street to Ninth, in which are the Times and World newspapers, several stores and many offices, seemed in great danger, as it was soon on fire in the upper story adjoining the Scarritt block. The electric wires soon went down and everybody left the building. and directly across the street from the

The fire burned fiercely from 3 o'clock The fire burned fiercely from 9 o'clock until 10:30, by which hour nothing but the walls remained of the Scarritt block. The loss on this building is \$50,000; insurance \$20,000. The building was unoccupied. The damage in the Hall building is not great. The mechanical department of the Times, was shut down for nearly two hours, but the paper has suffered no material damage. The office of the World was flooded.

Ousside the Scarritt building, the most serious damage was done to the building occupied by the Campbell & Eaton Crockery Company, fronting on Main street and running back to the rear end of the Scarritt block. A few thousand dollars, however, will cover the loss on building and contents.

### MEMBERS OF THE ICE EXCHANGE

After Their Meeting Last Night-Would Not Divalge what Transpired, but it is Among the Exchange People-The Conanmers' Opposition Movement Mas Assumed Threatening Proportions.

recently organized Wheeling Ice change was held in the office of Mr. R. H. D. Willis, for the purpose of considering late phases in the ice situation ms about to become interest ing to the extent of open and bitter

The situation can be summed up in a few words. A few days ago the Wheeling Ice Exchange, having in its membership all of the fourteen dealers in ice, both in Wheeling and the over-the-river towns was organized on a permanent basis. A scale of prices was announced, being a considerable advance over last year's. The exchange makes the claim that there has been no profit in the business at the prices that have prevailed for the past three sca-sons, and that it was a matter of business life to bring prices to a healthy

basis.

The larger consumers of ice did not look with favor on the new price list and took steps to form an opposition company. It was at first proposed to build a modern ice plant, but this was given up for the present, at least, and the Consumers' association has decided to make arrangements for securing ice from factories outside the city. It is said negotiations have been had with the Koehnline company, of Steubenville, which it is claimed, will furnish the Consumers company with ice at a price which will enable it to sell at a profit at last years prices. The Consumers company has also secured favorable prices from natural ice people, including firms at Chippewa Lake, Toledo, Sandusky and Cleveland.

It is the progress made by the Consumers' association that caused the Wheeling Ice Exchange to meet in special session last night. When an Intelligencer man made an effort to learn what had been done at the exchanges meeting, he was informed that the matter of giving out information to the press had been considered in the meeting and it was decided to withhold all information. Thus the Wheeling Ice Exchange follows the example of some of the city's councilmen who have lately evinced a disposition to transact the business of the city belind closed doors—in dark lamiern session, as it were, it is probable the people will admire some of the dark lanternites. In council.

It was said yesterday that some of the presses of the city exchange wereabout.

It was said yesterday that some of the numbers of the ice exchange were about to weaken and withdraw from the organization. Roth & Butler were mentioned in this connection, but when Mr. Butler was seen last night he denied the rumor most emphatically.

The claim is made that the Wheeling Ice & Storage Company is actually unable to make ice and sell it at last year's prices at a profit. This is said to be on account of the old machinery that is in use, the process used being mere expensive than later processes in use in plants constructed later.

The Consumers' company is already
